

AMENDMENTS TO THE CLAIMS
--------------------------

Claim 1 (currently amended)

1. An oil-in water microemulsion comprising an oil phase and a water phase and:
- (a) at least one emulsifier (emulsifier A), chosen from the group consisting of emulsifiers having the following properties
    - their lipophilicity is either dependent on the pH inasmuch as an increase or decrease in pH results in an increase or decrease in lipophilicity, it being unimportant which of the two possibilities of change in the lipophilicity is effected by the increase or the decrease in the pH, and/or
    - their lipophilicity is dependent on the temperature inasmuch as the lipophilicity increases with increasing temperature and their hydrophilicity increases with decreasing temperature,
  - (b) optionally further comprising substances which are soluble or dispersible in the oil phase or the water phase,
  - (c) an effective amount of shea butter to reduce stickiness/greasiness of the oil-in-water emulsion which comprises 0.5% to 10% by weight of shea butter.

Claims 2-5 (cancelled)

Claim 6 (currently amended)

6. The oil-in-water emulsion of claim 2 1, wherein the emulsifier A is present in concentration of 0.05-10% by weight based on the total weight of the composition.

Claim 7 (currently amended)

7. The oil-in-water emulsion of claim 2 1, wherein the emulsifier A is present in concentration of 0.1-5% by weight based on the total weight of the composition.

Claim 8 (cancelled)

Claim 9 (currently amended)

9. The oil-in-water emulsion of claim 3 1, which comprises 1% to 5% by weight of shea butter.

Claim 10 (previously added)

10. The oil-in-water emulsion of claim 1 wherein the substances of (b) are emulsifiers which are not covered by the definition of emulsifier A.

Claim 11 (previously added)

11. The oil-in-water emulsion of claim 10 wherein the emulsifiers which are not covered by the definition of emulsifier A are oil-in-water-emulsifiers.
